

## ImmersaWorld Inflatable Dome

Dual pressure 360° inflatable dome for immersive visual presentation or planetarium use.

### Non-rigid structure

ImmersaWorld is a fully hemispherical inflatable dome providing a 360° visual experience for both exhibition and public display use. Dual pressure technology ensures a perfect display surface on the interior of the dome while maintaining ease of access for auditorium set up and user entry and exit.

The ImmersaWorld theatre is designed with simplicity, speed and safety in mind. Once unpacked the operator can have the entire system ready for presentation use in less than 30 minutes. Specialist knowledge is not required.

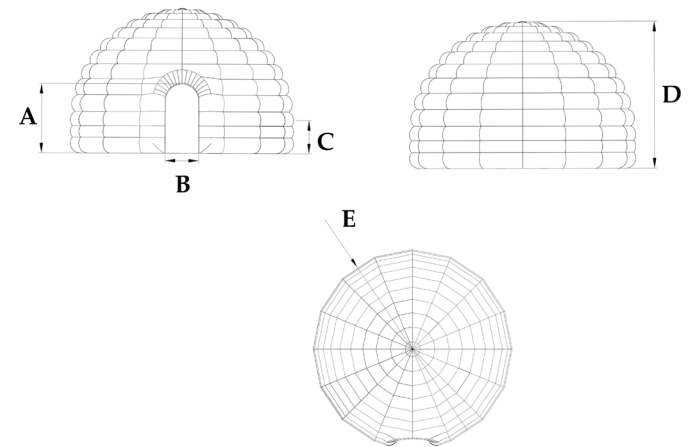

With no hard edges or airlock doors the ImmersaWorld is an easily accessible, simple and safe way to entertain and educate groups of up to 30 people in a fully immersive visual environment.

### Optional projection technology

Optical hardware can be provided from our ImmersaLux series of projectors. All the projection hardware is fixed centrally on a purpose built and fully adjustable mount.

Exterior diameter	Interior diameter	Height	Weight
6.2m	5.0m	4.8m	220kg
7.2m	6.0m	5.8m	260kg
8.2m	7.0m	6.3m	280kg
9.2m	8.0m	6.8m	300kg
10.2m	9.0m	7.3m	320kg
13.2m	12.0m	8.8m	400kg
